Statistical Sciences

Contents

PAGE

Edgeworth Expansion for Kernel Estimators of a Distribution Function ..... Zhong Huang and Yoshihiko Maesono 1

On Markov Perfect Equilibria in Baseball ..... Akifumi Kira and Keisuke Inakawa 11

Model selection for functional mixed model via Gaussian process regression ..... Toshihiro Misumi 23

Bahadur representation, quantile, finite population, asymptotic normality, survey sampling, empirical distribution function ..... Hitoshi Motoyama 37

The Erdös-Turán Law for Mixtures of Dirichlet Processes (II) ..... Hajime Yamato 47

Selecting better generic drugs ..... Masanobu Hayakawa, Takashi Yanagawa, Ying Jiang and Rieko Sakurai 53

Vol.46, December, 2014

BULLETIN OF INFORMATICS AND CYBERNETICS

Editor-in-Chief

Yoshihiko MAESONO

Editorial Board

Kazuo ANRAKU, Setsuo ARIKAWA, Sachio HIROKAWA
Hideo HIROSE, Seiichi IWAMOTO, Yasuo KAWAHARA
Hidefumi KAWASAKI, Genshiro KITAGAWA, Sadanori KONISHI
Masami KURANO, Satoru MIYANO, Mitsuhiro NAKAO
Ryuei NISHII, Toshio SAKATA, Shingo SHIRAHATA
Masayuki TAKEDA, Masayuki UCHIDA, Michiko WATANABE
Takashi YANAGAWA, Masami YASUDA

Editorial Assistants

Shuichi INOKUCHI, Hiroki MASUDA

Founder and Past Editor: Tosio KITAGAWA
Past Editors: Setsuo ARIKAWA, Takashi YANAGAWA, Sadanori KONISHI

RESEARCH ASSOCIATION OF STATISTICAL SCIENCES

Research Association of Statistical Sciences has been established in February 1941 by Professor Tosio Kitagawa (1909.10.3–1993.3.13), collaborated with about one hundred mathematical and statistical scientists in Japan. Its general objects were to promote and to extend mathematical and statistical methods for studying phenomena in social and natural sciences. The Association launched the *Bulletin of Mathematical Statistics*, the first international journal of statistics published in Japan, in 1941, and has published 19 volumes of the *Bulletin* during the period of 1941 and 1981. Main topics discussed in the earlier papers were sample survey, sampling inspection, design of experiments and statistical quality control, and those topics were extended to modern statistical inference, control theory, mathematical programming, cybernetics, data analysis, and informatics in later period. The importance was emerged of strengthening its activities in Information Science and Computer Science, and the Association changed the name of the *Bulletin* to the *Bulletin of Informatics and Cybernetics* in 1982(Vol. 20, No. 1 $\sim$ 2). Now the *Bulletin* published papers covering the wide range of topics in Information Science, Statistical Science, and Computer Science. Original papers, and authoritative expository or review articles, will be accepted for publication in the *Bulletin of Informatics and Cybernetics* if judged consistent with the general objects via refereeing process.

INFORMATION FOR CONTRIBUTORS

1. Manuscripts (pdf file) should be sent to the Editor–in–Chief
   Yoshihiko Maesono
   Faculty of Mathematics
   Kyushu University
   744 Motooka, Nishi-Ku
   Fukuoka 819-0395
   Japan.
   E-mail: maesono@math.kyushu-u.ac.jp

2. All papers are refereed.

3. Manuscripts should be submitted in English. It is understood that their contents are unpublished and are not being submitted for publication elsewhere.

4. When accepted for the publication the final manuscripts should be written in LaTeX using BIC style class file, which can be obtained from internet. Files are available from `http://bic.math.kyushu-u.ac.jp/`

5. Figures and tables should be printable together with the LaTeX text as a LaTeX output.

6. Authors should always keep a fully up–to–date version of the LaTeX text.

7. Page proofs will be sent to authors. No new material may be inserted in the text at the time of proofreading, except where advance permission has been obtained for the Editor.

8. The author is requested to pay for 100 copies of the reprint as page charges.
