A Study on Non-Photorealistic Rendering Technique for Visualization of Dyeing Cloth

森本，有紀
九州大学大学院芸術工学府

https://doi.org/10.15017/10322
目次

はじめに ........................................................................................................................................... 1
第一章 序論 ...................................................................................................................................... 3
  1. 1 本研究の背景 .......................................................................................................................... 4
  1. 1. 1 NPR ................................................................................................................................. 4
  1. 1. 2 浸透性画材の NPR ....................................................................................................... 5
  1. 1. 3 布の表現研究 .................................................................................................................... 7
  1. 1. 4 染色化学分野での研究 ..................................................................................................... 8
  1. 2 本研究の目的 .......................................................................................................................... 8
第二章 染色 ...................................................................................................................................... 10
  2. 1 染色の基本過程 ...................................................................................................................... 11
  2. 2 代表的な染色技法 .................................................................................................................. 12
  2. 3 染料と布 .................................................................................................................................. 14
  2. 4 染色の特徴 ............................................................................................................................. 15
第三章 appearance ベースによる染色モデル ........................................................................... 17
  3. 1 モデルの概要 .......................................................................................................................... 18
  3. 2 布の織構造モデル .................................................................................................................... 19
  3. 3 染料拡散モデル ......................................................................................................................... 20
  3. 4 染料と布のレンダリング ......................................................................................................... 22
  3. 4. 1 染料の量による色の決定 ................................................................................................. 22
  3. 4. 2 布の陰影表現 .................................................................................................................. 22
  3. 5 実験と結果 ................................................................................................................................ 23
  3. 5. 1 染色の特徴表現 ................................................................................................................. 23
  3. 5. 2 染色風画像の表現 ............................................................................................................. 25
  3. 5. 3 染色技法の表現 ................................................................................................................ 26
第四章 physics ベースによる染色モデル ................................................................................. 29
  4. 1 モデルの概要 .......................................................................................................................... 30
  4. 2 布の織構造モデルと設定のための GUI ................................................................................. 31
  4. 3 拡散と吸着 ................................................................................................................................ 34
  4. 3. 1 染料拡散の定義と特徴 ................................................................................................. 34
  4. 3. 2 染料の拡散と吸着 ............................................................................................................. 34
  4. 3. 3 拡散の制限 ........................................................................................................................ 35
  4. 3. 4 乾燥した布への染料拡散表現 ......................................................................................... 37
  4. 4 染料と布のレンダリング ......................................................................................................... 38
  4. 4. 1 染料の量による色の決定 ................................................................................................. 38
