Creating the Future Ecosystem of Academic Resources in Kyushu University

Kyushu University Library has spent much energy to develop the ecosystem of academic resources including the library rich collections and the university research outputs. In the process of development, we have adjusted many aspects of the library at the level of both technical management and human resources.
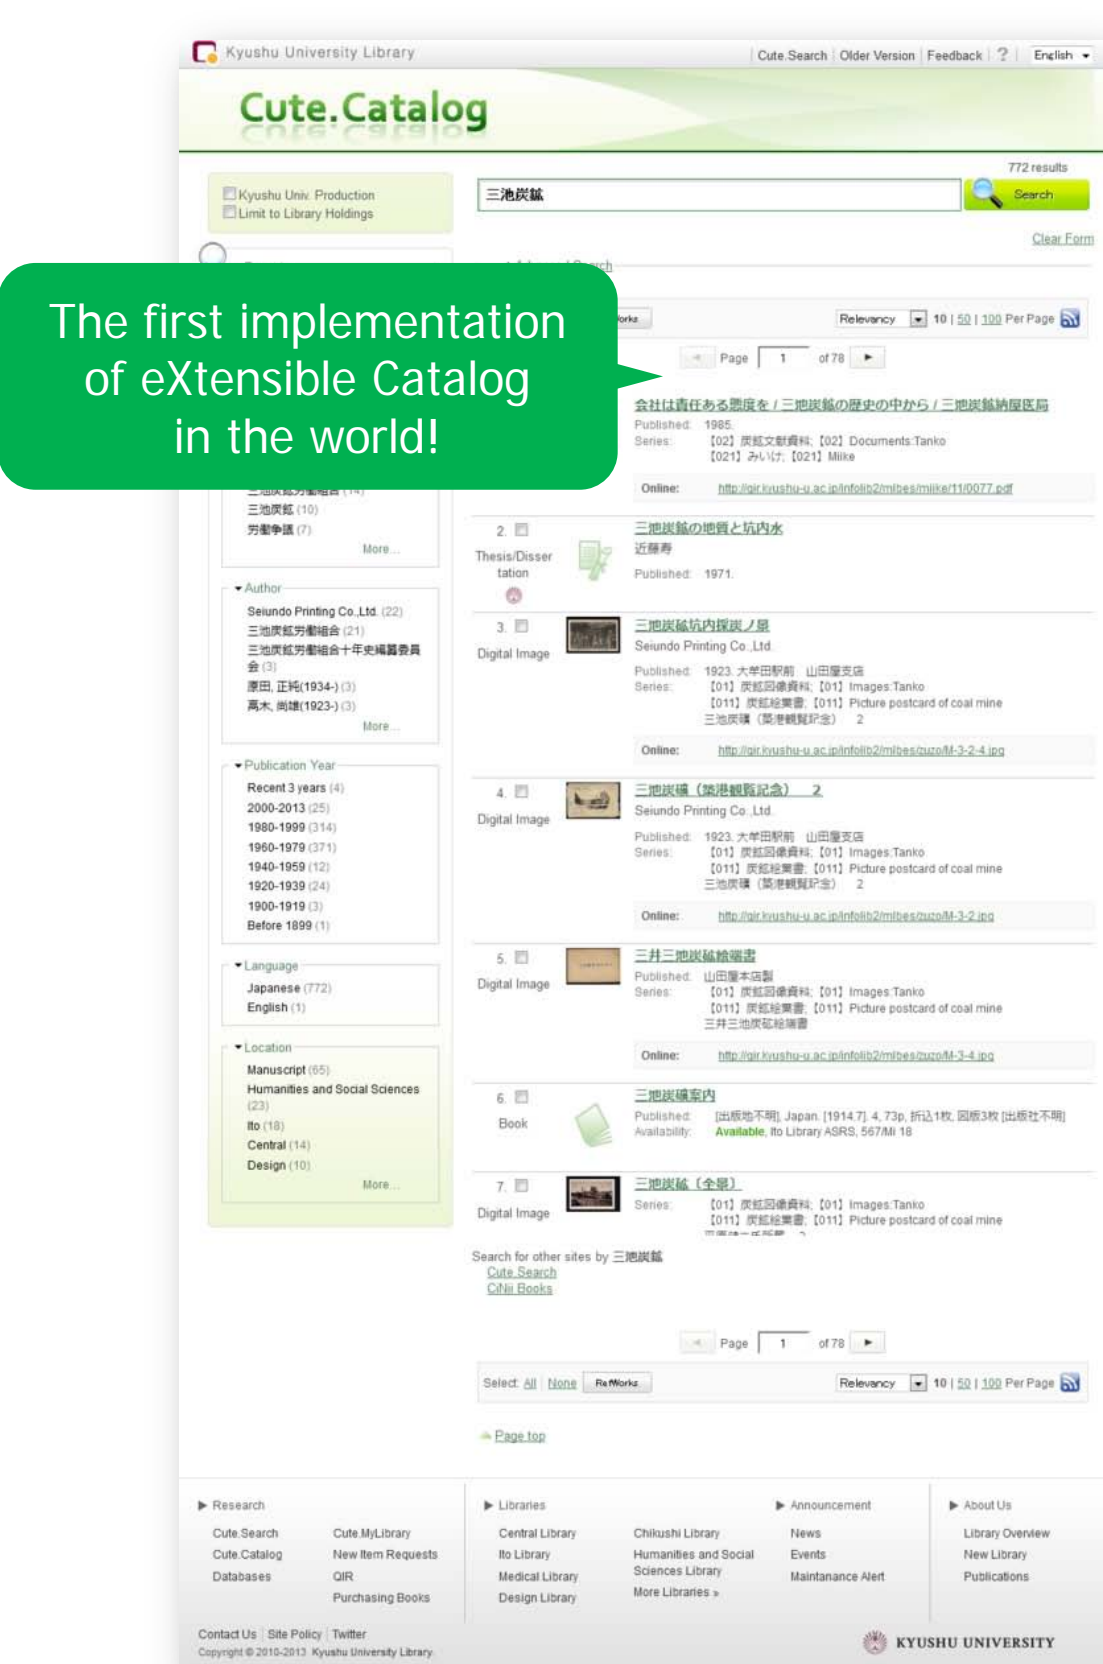

九州大学
KYUSHU UNIVERSITY

We are here

Archiving the University Academic Resources

Cumulating and disseminating metadata of rich academic collections held by university and academic articles produced by researchers into Cute.Catalog

- Doctoral dissertations
- Departmental bulletin papers

QIR 九州大学学術情報リポジトリ
Kyushu University Institutional Repository

Archiving university's research output and making them open access.

- Library holdings
- Digital images collections
- Academic journal articles by KU researchers
- Educational resources
- Research data

Discovery Environment

Developing advanced discovery services to improve accessibility to diverse academic resources
