## *Contents*

	PAGE
On jackknife variance estimator for kernel density estimator and its application .....	
.....Atsufumi NISHIMOTO and Yoshihiko MAESONO	1
An explicit formula of the Shapley value for the conjugate-point game .....	
.....Takeaki FUCHIKAMI and Hidefumi KAWASAKI	11
Successive comparisons between ordered normal means based on closed testing procedure .	
.....Tsunehisa IMADA	25
Sparse regression modeling via the MAP Bayesian lasso .....	
.....Ibuki HOSHINA	37
Comparing predictive values of statistical test vs. AIC and BIC in one sample problem ....	
.....Ryo TAJIRI, Kasumi IWAMOTO, Kei FUJIKAWA and Takashi YANAGAWA	59
Approximate distributions for the number of distinct components of the Ewens sampling ..	
formula and its applications .....Hajime YAMATO, Toshifumi NOMACHI and Koichiro TODA	69
Selection of decision boundaries for logistic regression .....	
.....Hidetoshi MATSUI	83

## RESEARCH ASSOCIATION OF STATISTICAL SCIENCES

Research Association of Statistical Sciences has been established in February 1941 by Professor Tosio Kitagawa (1909.10.3–1993.3.13), collaborated with about one hundred mathematical and statistical scientists in Japan. Its general objects were to promote and to extend mathematical and statistical methods for studying phenomena in social and natural sciences. The Association launched the *Bulletin of Mathematical Statistics*, the first international journal of statistics published in Japan, in 1941, and has published 19 volumes of the *Bulletin* during the period of 1941 and 1981. Main topics discussed in the earlier papers were sample survey, sampling inspection, design of experiments and statistical quality control, and those topics were extended to modern statistical inference, control theory, mathematical programming, cybernetics, data analysis, and informatics in later period. The importance was emerged of strengthening its activities in Information Science and Computer Science, and the Association changed the name of the *Bulletin* to the *Bulletin of Informatics and Cybernetics* in 1982(Vol. 20, No. 1 ~ 2). Now the *Bulletin* published papers covering the wide range of topics in Information Science, Statistical Science, and Computer Science. Original papers, and authoritative expository or review articles, will be accepted for publication in the *Bulletin of Informatics and Cybernetics* if judged consistent with the general objects via refereeing process.

## INFORMATION FOR CONTRIBUTORS

1. Manuscripts (pdf file) should be sent to the Editor-in-Chief  
Yoshihiko Maesono  
Faculty of Mathematics  
Kyushu University  
744 Motoooka, Nishi-Ku  
Fukuoka 819-0395  
Japan.  
E-mail: [maesono@math.kyushu-u.ac.jp](mailto:maesono@math.kyushu-u.ac.jp)
2. All papers are refereed.
3. Manuscripts should be submitted in English. It is understood that their contents are unpublished and are not being submitted for publication elsewhere.
4. When accepted for the publication the final manuscripts should be written in L<sup>A</sup>T<sub>E</sub>X using BIC style class file, which can be obtained from internet. Files are available from <http://bic.math.kyushu-u.ac.jp/>
5. Figures and tables should be printable together with the L<sup>A</sup>T<sub>E</sub>X text as a L<sup>A</sup>T<sub>E</sub>X output.
6. Authors should always keep a fully up-to-date version of the L<sup>A</sup>T<sub>E</sub>X text.
7. Page proofs will be sent to authors. No new material may be inserted in the text at the time of proofreading, except where advance permission has been obtained for the Editor.
8. The author is requested to pay for publication charges which depend on manuscript length.
