Shanghai First People's Hospital
The University of Hong Kong
Tokushima University Hospital
University of Malaya Medical Centre
University of Occupational and Environmental Health (Japan)
VinaREN - Vietnam Research and Education Network

27 institutes answered the questionnaire

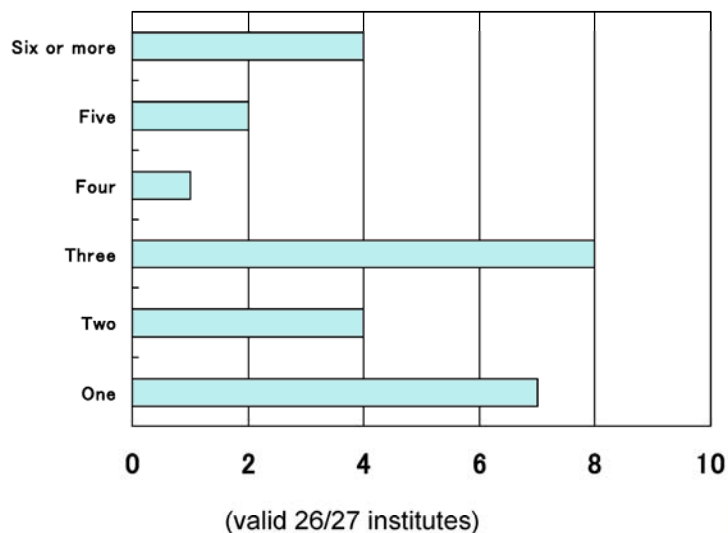

Supporting unit for telemedicine activity

Main job of each unit (multiple answers allowed)

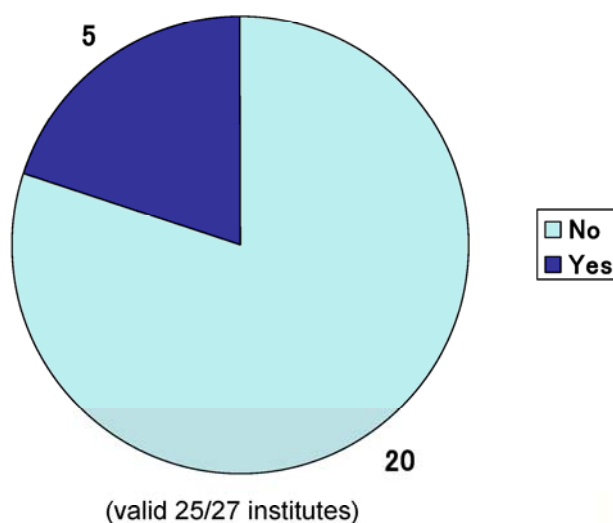

Supporting unit for telemedicine activity

Number of engineering staffs for telemedicine activity

Supporting unit for telemedicine activity

Require any cost for the supporting?

Equipped devices

LCD Monitor

Yes No

(valid 26/27 institutes)

Plasma display

Yes No

(valid 26/27 institutes)

Projector

Yes No

(valid 22/27 institutes)

Equipped devices

VPN router (Allied Telesis AR5xx or AT-AR7xx)

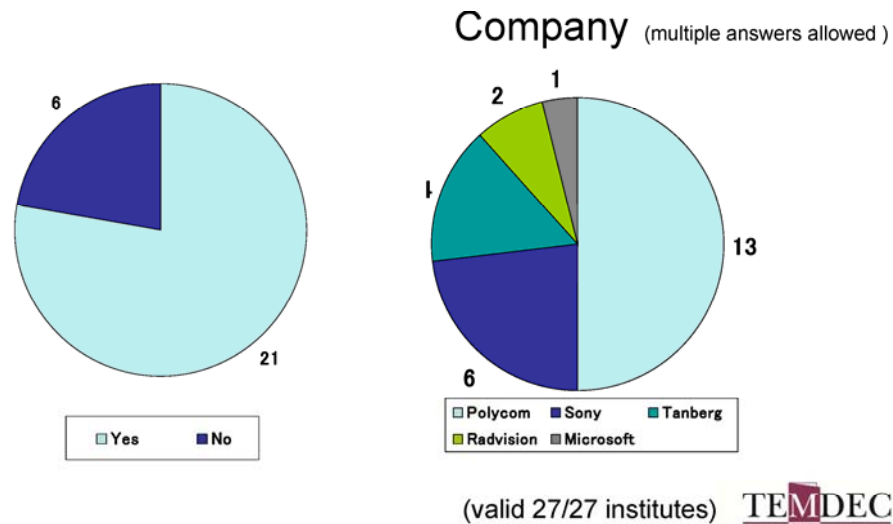

Yes No

(valid 27/27 institutes)

Equipped devices

H.323 compatible TV conference system,

Comments from answerers

Lack of human resources (supporting staff)

Lack of skill for handling devices.

Lack of experience of telemedicine activity with DVTS

Lack of activeness for telemedicine activity in medical doctor

Lack of equipments (cost)

IEEE interface availability in the future

Network trouble (Routing, Firewall)

Accessibility of DVTS MCU (Quatre) system

Loop back noise

Summary of engineers session

- Four sessions and 15 presentations
- Around 30 people joined technical session
- Active discussions about telemedicine activity with DVTS (Audio, Visual, Network and etc) were held at each session.
- We opened Webpage of engineers on windows live™ for better communication and sharing information.
- Local engineering staffs include some specialists, like “Network”, “Audio visual”, “Education”, “Medical Informatics” etc.
