### III 国際シンポジウム

# The 27<sup>th</sup> Hot Spring Harbor International Symposium 2017 Frontiers in Stem Cell Research and Reprogramming

October 31 10:00 – 18:20

[Tue] Short-Talk Session for Young Scientists 14:45 – 16:35

November 1 10:00 – 15:00

[Wed]

2F Collaborative Research Station-I, Hospital Campus, Kyushu University

病院キャンパス コラボステーション I 2F 視聴覚ホール

## Invited Speakers

### Nick Barker

A\*STAR Institute of Medical Biology  
Singapore

### Katsuhiko Hayashi

Kyushu University  
Japan

### Masaki Ieda

Keio University  
Japan

### Tomoya Kitajima

RIKEN CDB  
Japan

### Frédéric Lemaigre

Université catholique de Louvain  
Belgium

### Han Li

Institut Pasteur  
France

### Seiji Okada

Kyushu University  
Japan

### Atsushi Suzuki

Kyushu University  
Japan

### Takanori Takebe

Yokohama City University  
Japan

### Keiyo Takubo

National Center for Global  
Health and Medicine  
Japan

### Yusuke Torisawa

Kyoto University  
Japan

### Ludovic Vallier

University of Cambridge  
UK

### Marius Wernig

Stanford University School of Medicine  
USA

### Tomoyuki Yamaguchi

University of Tokyo  
Japan

### Satoshi Yamazaki

University of Tokyo  
Japan

## Access

空 路：福岡空港 → (地下鉄空港線) → 「中洲川端駅」、貝塚方面へ乗換 → (地下鉄箱崎線) → 「馬出九大病院前駅」で下車

J R : 「JR 博多駅」 → (地下鉄空港線) → 「中洲川端駅」、貝塚方面へ乗換 → (地下鉄箱崎線) → 「馬出九大病院前駅」で下車  
「JR 博多駅」 → 「JR 吉塚駅」で下車

西 鉄：西鉄福岡駅 → (地下鉄) → 馬出九大病院前駅で下車

高速バス：天神バスセンターより下車 → (地下鉄) → 「馬出九大病院前駅」で下車

## Program

<http://www.bioreg.kyushu-u.ac.jp/lab0/orgreg/HSS2017.pdf>

主催：九州大学 生体防御医学研究所

共催：共同利用・共同研究拠点 多階層生体防御システム研究拠点

共同利用・共同研究拠点 トランスオミクス医学研究拠点ネットワーク形成事業

The 27th Hot Spring Harbor International Symposium  
**Frontiers in Stem Cell Research and Reprogramming**  
Medical Institute of Bioregulation, Kyushu University

**October 31 - November 1, 2017**

Collaborative Research Station-I, Hospital Campus, Kyushu University, Fukuoka, JAPAN

---

**Tuesday, October 31, 2017**

---

10:00 - 10:05      Opening Remarks:  
**Yusaku Nakabeppu** (Director of Medical Institute of Bioregulation)

**Session 1: Pluripotent stem cell and differentiation**

Chair: **Hiroyuki Sasaki**

- 10:05-10:40      S-01 : **Ludovic Vallier** (University of Cambridge, UK)  
Modeling Metabolic disorders using human Pluripotent Stem Cells
- 10:40-11:05      S-02 : **Takanori Takebe** (Yokohama City University, Japan)  
Organoid Models of Human Liver Development towards Therapy
- 11:05-11:30      S-03 : **Katsuhiko Hayashi** (Kyushu University, Japan)  
Stem cell-based in vitro gametogenesis for a better understanding of oocyte differentiation
- 11:30-11:40      Group Photos
- 11:40-13:00      Lunch (meeting invited speakers only)

**Session 2: Stem cell and development**

Chair: **Yoshihiro Baba**

- 13:00-13:35      S-04 : **Frédéric Lemaigre** (Université catholique de Louvain, Belgium)  
Dynamics of gene regulatory networks in hepatocyte differentiation
- 13:35-14:00      S-05 : **Tomoya Kitajima** (RIKEN CDB, Japan)  
Roles of large cytoplasmic size of eggs
- 14:00-14:25      S-06 : **Satoshi Yamazaki** (University of Tokyo, Japan)  
Understanding of bone marrow environment and control of hematopoietic stem cells
- 14:25-14:45      Coffee break

---

**Session 3: Short Talks by Young Scientists**

---

Chair: **Hiroki Shibata**

- 14:45-16:35 Short talks of 11 minutes each (see p.3 for details)  
16:35-16:55 Coffee break

---

**Session 4: Direct reprogramming**

---

Chair: **Takeshi Bamba**

- 16:55-17:30 S-07 : **Marius Wernig** (Stanford University School of Medicine, USA)  
How to make a neuron
- 17:30-17:55 S-08 : **Masaki Ieda** (Keio University, Japan)  
Direct Cardiac Reprogramming, Cell Fate Decision, and Heart Regeneration
- 17:55-18:20 S-09 : **Atsushi Suzuki** (Kyushu University, Japan)  
Direct reprogramming to hepatic and intestinal lineages
- 19:30- Dinner party (by invitation only)
- 

---

**Wednesday, November 1, 2017**

---

---

**Session 5: Stem cell and disease**

---

Chair: **Keiichi Nakayama**

- 10:00-10:35 S-10 : **Nick Barker** (A\*STAR Institute of Medical Biology, Singapore)  
Lgr5+ Stem Cells in Epithelial Homeostasis, Regeneration and Cancer
- 10:35-11:00 S-11 : **Tomoyuki Yamaguchi** (University of Tokyo, Japan)  
Interspecies organogenesis generates autologous functional islets
- 11:00-11:25 S-12 : **Seiji Okada** (Kyushu University, Japan)  
Spinal cord regeneration and astrogliosis
- 11:25-13:30 Lunch (meeting invited speakers only)

---

**Session 6: Stem cell aging and technology**

---

Chair: **Yasuyuki Ohkawa**

- 13:30-14:05 S-13 : **Han Li** (Institut Pasteur, France)  
Cellular senescence promotes cellular plasticity in muscle reprogramming and regeneration
- 14:05-14:30 S-14 : **Keiyo Takubo** (National Center for Global Health and Medicine, Japan)  
Metabolic regulation and hematopoietic stem cell aging
- 14:30-14:55 S-15 : **Yusuke Torisawa** (Kyoto University, Japan)  
Cell-generated niches for organ-on-a-chip microdevices
- 14:55-15:00 Closing Remarks: **Atsushi Suzuki** (Kyushu University, Japan)

### **Session 3: Short Talks by Young Scientists**

---

Chair: Hiroki Shibata

Tuesday, October 31, 2017

14:45-16:45 Short talks of 11 minutes each

**Y-01: Kosuke Aoki** (Kyushu University, Japan)

Genetic analysis of rippling muscle disease (RMD) using Linkage-Assisted Exome Sequencing

**Y-02: Naoki Haruyama** (Kyushu University, Japan)

Accumulation of 8-oxoguanine in the nuclei of newly-generated GABAergic neurons in the nucleus accumbens and islands of Calleja contributes to locomotor hyperactivity in aged mice

**Y-03: Kentaro Hosokawa** (Kyushu University, Japan)

Foxp2 is essential for the quiescent state and self-renewal capacity of hematopoietic stem cells

**Y-04: Takashi Ishiuchi** (Kyushu University, Japan)

Epigenetic barrier screen identifies a regulator for extraembryonic development

**Y-05: Tetsuro Komatsu** (Kyushu University, Japan)

Novel histone H3.3 sub-variants are required for skeletal muscle regeneration

**Y-06: Naoto Kubota** (Kyushu University, Japan)

Identification of *DMRT3* gene enhancer involved in the pathogenesis of spastic cerebral palsy

**Y-07: Taito Matsuda** (Kyushu University, Japan)

Pioneer factor NeuroD1 rearranges transcriptional and epigenetic architecture in microglia to execute neuronal reprogramming

**Y-08: Akinobu Matsumoto** (Kyushu University, Japan)

Functional polypeptides encoded by putative long non-coding RNAs

**Y-09: Yuki Soma** (Kyushu University, Japan)

Reprogramming of Collective Microbial Cell Behavior

**Y-10: Jumpei Yamamoto** (Kyushu University, Japan)

Hepatic maturation of iHep cells in cell aggregation culture

The 27th Hot Spring Harbor International Symposium

## Frontiers in Stem Cell Research and Reprogramming 2017

Date: October 31 - November 1, 2017

Venue: Collabostation I, 2F Hall Kyushu University.
