BULLETIN of INFORMATICS AND CYBERNETICS

RESEARCH ASSOCIATION OF STATISTICAL SCIENCES

Contents

	PAGE
Asymptotic property of wrapped Cauchy kernel density estimation on the circle	1
Axiom of choice and Zorn's lemma in Cantor categories	11
Note on closed testing procedure and sequentially rejective step down procedure	35
Error reduction for kernel distribution function estimators	53
Large deviation probabilities for maximum likelihood estimator and Bayes estimator of a	
	67
Shifted binomial approximations for Ewens sampling formula	81
Hybrid estimation for an ergodic diffusion process based on reduced data	89

Vol.49, December, 2017

RESEARCH ASSOCIATION OF STATISTICAL SCIENCES

Research Association of Statistical Sciences has been established in February 1941 by Professor Tosio Kitagawa (1909.10.3–1993.3.13), collaborated with about one hundred mathematical and statistical scientists in Japan. Its general objects were to promote and to extend mathematical and statistical methods for studying phenomena in social and natural sciences. The Association launched the Bulletin of Mathematical Statistics, the first international journal of statistics published in Japan, in 1941, and has published 19 volumes of the Bulletin during the period of 1941 and 1981. Main topics discussed in the earlier papers were sample survey, sampling inspection, design of experiments and statistical quality control, and those topics were extended to modern statistical inference, control theory, mathematical programming, cybernetics, data analysis, and informatics in later period. The importance was emerged of strengthening its activities in Information Science and Computer Science, and the Association changed the name of the Bulletin to the Bulletin of Informatics and Cybernetics in 1982(Vol. 20, No. $1 \sim 2$). Now the Bulletin published papers covering the wide range of topics in Information Science, Statistical Science, and Computer Science. Original papers, and authoritative expository or review articles, will be accepted for publication in the Bulletin of Informatics and Cybernetics if judged consistent with the general objects via refereeing process.

INFORMATION FOR CONTRIBUTORS

- Manuscripts (pdf file) should be sent to the Editor-in-Chief Yoshihiko Maesono Faculty of Mathematics Kyushu University 744 Motooka, Nishi-Ku Fukuoka 819-0395 Japan. E-mail: maesono@math.kyushu-u.ac.jp
- 2. All papers are refereed.
- 3. Manuscripts should be submitted in English. It is understood that their contents are unpublished and are not being submitted for publication elsewhere.
- 4. When accepted for the publication the final manuscripts should be written in IAT_EX using BIC style class file, which can be obtained from internet. Files are available from http://bic.math.kyushu-u.ac.jp/
- 5. Figures and tables should be printable together with the LATEX text as a LATEX output.
- 6. Authors should always keep a fully up-to-date version of the LATEX text.
- 7. Page proofs will be sent to authors. No new material may be inserted in the text at the time of proofreading, except where advance permission has been obtained for the Editor.
- 8. The author is requested to pay for publication charges which depend on manuscript length.
