The pselaphid species, *Nipponobythus longicornis* Nomura et Lee, 1993 was described from South Korea on the basis of a male specimen collected at Samjeong Li, Mt. Chilisan. Unfortunately, this specific name is preoccupied by *N. longicornis* Löbl, 1965 from Chekiang, East China. The authors propose a new replacement name for this species as follows.

***Nipponobythus chilisanus* nom. nov.**

Nipponobythus fongicornis Nomura et Lee, 1993, Esakia, (33): 15.
