# CONTENTS

Retirement of Professor Eiichi KURAMOTO .....	1
Tensile Cyclic Strength and Macroscopic Failure Characteristics of C/C and the Metal Impregnated C/C By Masahiro MORIYAMA, Yoshihiro TAKAO, Wen-Xue WANG and Terutake MATSUBARA .....	25
Microscopic Investigation of Tensile Fatigue Damage of C/C and the Metal Impregnated C/C By Masahiro MORIYAMA, Yoshihiro TAKAO and Wen-Xue WANG .....	31
Prediction of the Stiffness and Stresses for Carbon Nano-Tube Composites Based on Homogenization Analysis By Dong-Mei. LUO, Wen-Xue WANG, Yoshihiro TAKAO and Koichi KAKIMOTO .....	37
Numerical Analysis of Ion Temperature Gradient Driven Drift Wave By Youji ANDOU, Sanae-I. ITOH and Masatoshi YAGI .....	47
Nonlinear Simulation of Neoclassical Tearing Mode By Emi MORI, Sanae-I. ITOH and Masatoshi YAGI .....	61
Dynamic Analysis of Radial Electric Field and Plasma Temperature using Extended Transport Model By Asasko TSUKAMOTO, Sanae-I. ITOH and Masatoshi YAGI .....	73
Measurements of Lattice Distortions near Silicon Surfaces Implanted with Low-Energy Nitrogen Ions by Reflection X-ray Topography By Koji FUTAGAMI, Taichiro FUKUMORI and Noboru TSUKUDA .....	89
Fabrication and High Heat Flux Tests of Plasma Sprayed Tungsten Coated Carbon and TZM By Kazutoshi TOKUNAGA, Yusuke KUBOTA, Nobuaki NODA, Yoshio IMAMURA, Akira KURUMADA, Naoaki YOSHIDA, Toshiaki SOGABE, Toshiyuki KATO and Bertram SCHEDLER .....	97
Surface Modification of Low Energy Helium Ion Implanted Austenitic Stainless Steel by Tensile Stress By Kazutoshi TOKUNAGA, Takayuki KAWAKAMI, Yoshio MIYAMOTO and Naoaki YOSHIDA .....	103
“Sato-Umi” ; New Concept for the Coastal Sea Management By Tetsuo YANAGI .....	109

Intermittent Bursting of Turbulence in a Stable Boundary Layer with Low-Level Jet By Yuji OHYA, Reina NAKAMURA, Takanori UCHIDA and Ken-ichiro SUGITANI .....	113
Basic Research for Clarification of Wake Structure behind a Wind Turbine By Takanori UCHIDA and Yuji OHYA .....	123
About the Handling of the Outflow Boundary in Unsteady Numerical Simulation of Airflow over Complex Terrain By Takanori UCHIDA and Yuji OHYA .....	129
Construction of High Resolution Elevation Data from Paper Map for Numerical Model “RIAM-COMPACT” By Takanori UCHIDA, Yuji OHYA, Ryo ARAYA, Masataka TANABE and Yasushi KAWASHIMA .....	135
Analysis of Thermally Activated Processes of Dislocation Loops within a Line Tension Model By Kazuhito OHSAWA and Eiichi KURAMOTO .....	143
Time-resolved Rocking Curve Measurement Method using Laboratory X-ray Source By Yujiro HAYASHI, Masanobu SATO, Mitsui KOGA, Noboru TSUKUDA and Eiichi KURAMOTO .....	151
In-situ Transmission Electron Microscope Observation of Material Irradiated with Low Energy Helium Ions By Hiroto Iwakiri and Naoaki Yoshida .....	155
Grain Boundary Embrittlement Mechanism due to Very Low Energy Helium Irradiation By Tomotsugu BABA, Hiroto Iwakiri and Naoaki Yoshida .....	165
