## Acknowledgments

I would like to thank Prof. Yoshitaka Nakajima for his kind advice, guidance, and friendship throughout my years of study in the Netherlands and in Japan. I wish to thank Prof. Yamashita and Prof. Iwamiya (Fukuoka) for their valuable comments and suggestions with regard to this thesis, as well as Prof. Ueda (Fukuoka), Prof. Sasaki (Sendai), and of course Prof. Gert ten Hoopen, my teacher in Leiden. I thank all the students of the laboratory of Prof. Nakajima for helping me with my studies, and for making life in the lab and in Japan such a pleasure. Thanks to my family in the Netherlands and in Japan, and especially to my wife Chisato for supporting me.
