

A study on collaborative environmental risk
management : modeling to facilitate the
prevention of soil contamination by local
governments, businesses, and local stakeholders

Hall, Michael W.

Table of Contents	iii
List of Abbreviations	vii

Chapter One

INTRODUCTION

1.1 Purpose and review of previous research	page 1
1.2 References	page 7

Chapter Two

BACKGROUND ON SOIL CONTAMINATION LAWS IN THE UNITED STATES, GERMANY, AND JAPAN

2.1 Background on soil contamination laws and regulations	page 8
2.1.1 Soil contamination laws in the United States	page 11
2.1.2 Soil contamination laws in Germany	page 15
2.1.3 Soil contamination laws in Japan	page 17
2.2 Convergence and divergence of environmental policies for soil contamination in the United States, Germany and Japan	page 19
2.3 A Collaborative Environmental Risk Management Template for the prevention of soil contamination	page 33
2.4 Conclusions	page 34
2.5 References	page 34

Chapter Three

ENVIRONMENTAL POLICY TOOLS: BACKGROUND ON EMS AND THE SIGNIFICANCE OF SOIL CONTAMINATION

3.1 Background on environmental management systems (EMS)	page 37
3.1.1 Role of local governments	page 40
3.1.2 Evolution of pollution protection to EMS	page 42
3.1.3 Outline of certified EMS implementation	page 44
3.1.4 Motivations and benefits for local governments to implement EMS	page 50
3.1.5 Key principals for successful implementation	page 52
3.1.6 Barriers to successful implementation	page 52

3.1.7	Benefits achieved by adopting EMS in public organizations in the United States	page 54
3.2	Background on environmental risk management (ERM)	page 57
3.2.1	Risk control methods	page 59
3.2.2	Risk financing	page 60
3.2.3	Risk assessment	page 61
3.3	The importance of including soil contamination measures in environmental risk management systems by businesses	page 64
3.3.1	Environmental risk management and the soil contamination issue	page 64
3.3.2	The importance of the soil contamination issue in environmental risk management	page 65
3.3.3	The significance of corporate responses to the soil contamination issue	page 65
3.3.4	The importance of soil contamination information—its importance for residents and purchasers	page 68
3.3.5	The importance of soil contamination information—its significance with Business to Business (B2B) transactions	page 69
3.3.6	Section conclusions	page 71
3.4	Environmental risk management policy for current and future soil Pollution Prevention (P2) issues	page 71
3.5	Conclusions	page 76
3.6	References	page 77

Chapter Four

COLLABORATION BY LOCAL GOVERNMENTS, BUSINESSES, AND LOCAL STAKEHOLDERS FOR ENVIRONMENTAL RISK MANAGEMENT

4.1	Chapter Introduction	page 81
Part I		
4.2	A comparative analysis of voluntary environmental reporting policies for EMS and ERM on soil contamination by businesses in the United States and Japan	page 82
4.2.1	Methodology	page 83
4.2.2	Results	page 84
4.2.3	Transparency	page 87
4.2.4	Part I Conclusions	page 88

Part II

4.3	Environmental decision making hierarchies in the United States, Germany, and Japan	page 89
4.3.1	Environmental decision-making schema in the U.S.	page 90
4.3.2	Environmental decision-making schema in Germany	page 94
4.3.3	Environmental decision-making schema in Japan	page 98
4.3.4	Part II conclusions	page 103

Part III

4.4	Capacity-building for collaboration by local governments	page 104
4.4.1	Challenges and barriers to collaboration	page 105
4.4.2	Process for creating a collaborative environmental risk management (CERM) system	page 108
4.4.3	Collaboration models used by local governments	page 111
4.4.4	Positive and negative boosters for CERM under legal pressure	page 112
4.4.5	Collaboration between government, academia, and industry in the United States, Germany, and Japan	page 118
4.5	Part III conclusions	page 120
4.6	References	page 121

Chapter Five

A COMPARATIVE CASE STUDY OF SASEBO CITY IN NAGASAKI PREFECTURE AND TACOMA CITY IN WASHINGTON STATE

5.1	Introduction	page 128
5.1.1	Tacoma City past and present	page 129
5.1.2	Sasebo City past and present	page 132
5.2	A comparison of the municipal structure of Tacoma City and Sasebo City	page 134
5.3	A comparison of revenues and expenses for Pierce County, Tacoma City, and Sasebo City	page 138
5.4	A comparative examination of environmental systems and policies of Tacoma City and Sasebo City	page 147
5.5	International, national, and local public opinion about the environment	page 157
5.6	Conclusions	page 159
5.7	References	page 161

Chapter Six

SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

6.1	Summary of thesis	page 164
6.2	Recommendations for local governments	page 168
6.3	Conclusions	page 171
6.4	Recommendations for future research	page 172
6.5	References	page 173

Appendixes

I	Hazardous Ranking System chemicals NPL site in U.S., German soil contamination trigger and precautionary values, and Environmental Quality Standards for SCCL	page 174
II	Data from environmental reports by U.S. and Japanese firms	page 185
III	Areas of soil contamination in Japan, Germany, and the United States	page 195
IV	Research Publications	page 198
	List of Figures	page 199
	List of Tables	page 201
