

[072]MI Lecture Note Series

<https://hdl.handle.net/2324/6795061>

出版情報 : MI lecture note series. 72, 2017-01-27. Institute of Mathematics for Industry,
Kyushu University

バージョン :

権利関係 :

Mathematical quantum field theory and related topics

6.6[MON]-6.8[WED]2016

Kyushu University, Japan

Table of Contents

1 Long-range charge order in the two-dimensional ionic Hubbard model	1
Tadahiro Miyao (Hokkaido University)	
2 Inequivalence of Quantum Dirac Fields of Different Masses and a General Structure Behind it	12
Asao Arai (Hokkaido University)	
3 Integrable and non-integrable models in quantum optics	22
Daniel Braak (University of Augsburg)	
4 Dressed Photons ... Concepts of off-shell photon and applications to light-matter fusion technology... ..	32
Motoichi Ohtsu (Tokyo University)	
5 Bohr's correspondence principle in the Nelson model	52
Marco Falconi (University of Rome Tre.)	
6 A KMS state on the resolvent CCR algebra	58
Tomohiro Kanda (Kyushu University)	
7 Semi-relativistic QED	68
Fumio Hiroshima (Kyushu University)	
8 Differentiability properties of stochastic flows in non-relativistic QED	76
Oliver Matte (Aarhus University)	
9 On the relationship between non-linear Schrödinger dynamics, Gross-Pitaevskii hierarchy and Liouville's equation.	85
Zied Ammari (University of Rennes 1)	

10 The radial Bargmann measure for the Fock space of type B.	90
Nobuhiro Asai (Aichi University of Education)	
11 On a mathematical treatment of measurement correlations	99
Kazuya Okamura (Nagoya University)	
12 How is the ground state of the (generalized) quantum Rabi model dressed with a real photon?	108
Masao Hirokawa (Hiroshima University)	
13 Self-avoiding walk on random conductors	112
Akira Sakai (Hokkaido University)	
14 Descriptive analysis of self-adjoint operators and the Weyl-von Neumann equivalence relation	119
Hiroshi Ando (Chiba University)	
15 Introduction of a mathematical approach to sum-frequency generation in non-linear optics	129
Masao Hirokawa (Hiroshima University)
